

Jana Laboratories Inc Opens Office in Europe

KWD-globalpipe, 2008-09-25, No.291. (Certification)

To **better serve our growing European and Middle Eastern clients**, Jana Laboratories is proud to announce the **opening of its European office**. The new office will be **located in St. Germain, France** and is scheduled to open in the Fall of 2008. **Jana Europe will provide consulting and technical project support**, maintaining the same focus on high level customer service and the provision of value-centered engineering solutions that has allowed Jana to become the pre-eminent piping systems knowledge solutions firm in the world.

“Europe and the Middle East have played a key role in Jana’s growth through the last decade” notes **Wayne Bryce, President of Jana Laboratories, Inc.** “Jana’s European office will enable us to continue this growth while still maintaining our focus on Client Service and Technical Excellence.”

Dr. Ken Oliphant, Jana’s Director of Client Solutions and Executive Vice President adds, “Europe has long been an innovator in plastic piping technology. Jana’s direct European presence will enable us to better support our European and Middle Eastern Clients in their technology innovation.”

Nathalie Legros will head the establishment of Jana Europe’s facilities. “I am very excited by the opportunity to enhance Jana’s role in the European plastic piping industry” states Ms. Legros.

Nathalie Legros, Market Manager – Europe, has a strong background in polymers and plastics processing. A Professional Engineer, she has worked in technical project management, research and development, product development and market analysis. Ms. Legros holds a Masters Degree in Applied Science (Polymer and Metal Forming) from Ecole National Supérieure des Mines de Paris, one of France’s top five Engineering schools.

Jana is the largest piping systems knowledge solutions firm in the world. With over 45 years piping systems testing and engineering experience and an internal budget of over \$2,000,000 in test development R&D over the past 5 years, Jana leads its industry in knowledge. With a values-based approach to **making its Clients win and the capability to deliver**, Jana works in partnership with its Clients to identify and eliminate their technical barriers to success. Delivering to over 90% of the top chemical companies in the world, over 80% of the top pipe companies in the world, 70% of the top gas distribution companies in North America and the top water companies in the world, **Jana’s services have supported the installation of over 1 billion meters of pipe** globally.
